**Learning from SARS** - Institute of Medicine  
2004-04-26

The emergence of severe acute respiratory  
syndrome (SARS) in late 2002 and 2003

challenged the global public health community to confront a novel epidemic that spread rapidly from its origins in southern China until it had reached more than 25 other countries within a matter of months. In addition to the number of patients infected with the SARS virus, the disease had profound economic and political repercussions in many of the affected regions. Recent reports of isolated new SARS cases and a fear that the disease could reemerge and spread have put public health officials on high alert for any indications of possible new outbreaks. This report examines the response to SARS by public health systems in individual countries, the biology of the SARS coronavirus and related coronaviruses in animals, the economic and political fallout of the SARS epidemic, quarantine law and other public health measures that apply to combating infectious diseases, and the role of international organizations and scientific cooperation in halting the spread of SARS. The report provides an illuminating

survey of findings from the epidemic, along with an assessment of what might be needed in order to contain any future outbreaks of SARS or other emerging infections.

**Complexity, Security and Civil Society in East Asia** - Peter Hayes 2015-06-22

Complexity, Security and Civil Society in East Asia offers the latest understanding of complex global problems in the region, including nuclear weapons, urban insecurity, energy, and climate change. Detailed case studies of China, North and South Korea, and Japan demonstrate the importance of civil society and 'civic diplomacy' in reaching shared solutions to these problems in East Asia and beyond. Each chapter describes regional civil society initiatives that tackle complex challenges to East Asia's security. In doing so, the book identifies key pressure points at which civil society can push for constructive

changes—especially ones that reduce the North Korean threat to its neighbors. Unusually, this book is both theoretical and practical. Complexity, Security and Civil Society in East Asia presents strategies that can be led by civil society and negotiated by its diplomats to realize peace, security, and sustainability worldwide. It shows that networked civic diplomacy offers solutions to these urgent issues that official ‘complex diplomacy’ cannot. By providing a new theoretical framework based on empirical observation, this volume is a must read for diplomats, scholars, students, journalists, activists, and individual readers seeking insight into how to solve the crucial issues of our time.

*The Law of State Immunity* - Hazel Fox

2013-08-29

The doctrine of state immunity bars a national court from adjudicating or enforcing claims against foreign states. This doctrine, the foundation for high-profile national and international decisions such as those in the

Pinochet case and the Arrest Warrant cases, has always been controversial. The reasons for the controversy are many and varied. Some argue that state immunity paves the way for state violations of human rights. Others argue that the customary basis for the doctrine is not a sufficient basis for regulation and that codification is the way forward. Furthermore, it can be argued that even when judgments are made in national courts against other states, the doctrine makes enforcement of these decisions impossible. This fully restructured new edition provides a detailed analysis of these issues in a more clear and accessible manner. It provides a nuanced assessment of the development of the doctrine of state immunity, including a general comprehensive overview of the plea of immunity of a foreign state, its characteristics, and its operation as a bar to proceedings in national courts of another state. It includes a coherent history and justification of the plea of state immunity, demonstrating its development from

the absolute to the restrictive phase, arguing that state immunity can now be seen to be developing into a third phase which uses immunity allocate adjudicative and enforcement jurisdictions between the foreign and the territorial states. The United Nations Convention on Jurisdictional Immunities of states and their Property is thoroughly assessed. Through a detailed examination of the sources of law and of English and US case law, and a comparative analysis of other types of immunity, the authors explore both the law as it stands, and what it could and should be in years to come.

*Digital Review of Asia Pacific 2009-2010* - Idrc, 2009-06-11

**Digital Review of Asia Pacific 2009-2010** - Idrc, 2009-06-03

The biennial Digital Review of Asia Pacific is a comprehensive guide to the state-of-practice and trends in information and communication technologies for development (ICTD) in the Asia Pacific region. This fourth edition (2009-2010) features 30 economies and four sub-regional groupings. The chapters provide updated information on ICT infrastructure, industries, content and services, key programs, enabling policies and regulation, education and capacity building, open source, and research and development initiatives, as well as ICTD challenges in each of the economies covered. The common framework that underpins these reports allows readers to undertake a comparative analysis and assess progress across Asia Pacific. In addition, regional overviews provide a synthesis of ICTD trends, regulatory issues, and lessons for managing innovation in the network economy. The thematic chapters focus on issues in ICT in education, a key area in ICTD. The authors are drawn from government,

academe, industry and civil society, providing a broad perspective on the use of ICTs for human development.

*Re-establishing Justice* - Pietro Bovati

1994-01-01

In this very significant work, translated from the Italian, Bovati examines in careful detail the practice of justice in ancient Israel, first the bilateral controversy (the rib), and then the legal judgement properly speaking. "Re-establishing Justice" is destined to become the standard reference work in the field. The contents deal with 1. The juridical dispute in general. 2 The accusation, 3 The response of the accused, 4 The reconciliation, 5. Judgement in court, 6.The acts and procedures preceding the debate, 7. The debate, 8. The sentence and execution.

*Freedom of Information Reform in China* -

Weibing Xiao 2013-03-01

Freedom of Information (FOI) in China is often perceived as a recent and intriguing phenomenon. This book presents a more complex and detailed understanding of the evolution of FOI in China, using information flow analysis to explore the gradual development of government receptivity to FOI in an information environment through time. The book argues that it is necessary to reassess the widely divergent origins of FOI reform in China, and asserts that social, political and legal factors should have central roles in understanding the development of FOI in China. The book uses information flow analysis to find that FOI reform in China formed part of a much longer process of increased transparency in the Chinese information environment, which gradually shifted from the acceptance of proactive disclosure to that of reactive disclosure. FOI thus has become a beneficiary of this gradual transformation of the Chinese information environment.

**ASEAN Law and Regional Integration** - Diane A Desierto 2020-12-30

Since the passage of the ASEAN Charter in 2008, ASEAN has transformed itself from a loose economic cooperation, into a formal intergovernmental organization designed to create an “ASEAN Community” forged together in three pillar communities - the ASEAN Political-Security Community, ASEAN Economic Community, and ASEAN Socio-Cultural Community. Forty years of pre-Charter ASEAN practices, coupled with over ten years of post-Charter ASEAN practices thus far, has witnessed the conclusion of hundreds of legally binding regional treaties and similarly binding international instruments in all areas of economic, political-security, and socio-cultural concerns for Southeast Asia to achieve ASEAN’s rule of law-based development objective. Pre-Charter and post-Charter ASEAN Law is variably implemented under a hybrid governance system that depends heavily on ASEAN Member State

national implementation alongside ASEAN’s evolving regional institutions. The result is not a model of deep integration as in the case of the European Union, but a particular paradigm of horizontal embeddedness of ASEAN Law - in all its norms and operational practices - contingent on the capacities and compliance of national government bureaucracies in Southeast Asia. This edited collection is a concise authoritative volume covering the practical, doctrinal, legal, and policy aspects of the new regime of ASEAN Law and its consequences for realizing rule of law-based development in Southeast Asia’s emerging single market and production base. Drawing together contributions from a range of key thinkers in the field, the editors present the legal and policy-making issues implicated in the practical implementation of Southeast Asia’s single market and its regime for the free movement of goods, services, foreign investment, and cross-border labor. The book also examines the nature of regional law-making

under ASEAN before and after the commencement of regional integration in 2015, the nature of ASEAN's economic regulators, as well as the evolving structure for enforcement and harmonization of "ASEAN Law" through the array of Southeast Asian national courts, arbitral tribunals, and incipient mechanisms for inter-State, intra-regional, and individual-State conflict management and dispute resolution. This book is highly relevant to students, scholars, and policy-makers with an interest in ASEAN Law and regional policy, and to Southeast Asian studies in general.

The Role of Taiwanese Civil Society Organizations in Cross-Strait Relations - Šárka Waisová 2017-08-23

Despite the instability of the political relationship between Taiwan and Mainland China, cross-strait activities such as trade, education, marriage and travel have prospered. While the main focus of current academic research has been on security and economic

relationships between the two governments, relatively little attention has been paid to social interactions or the role of civil society actors. This book investigates the role of Taiwanese civil society organizations in shaping the relationship between Mainland China and Taiwan. It explores the role of civil society organizations (CSOs) in building confidence and peace and shows that Taiwanese CSOs hold a very complicated position which has in fact added to tensions. Waisová's research looks closely at the roles civil society organizations play in conflict transformation, reconciliation and peacebuilding, the modalities of playing such roles, and the challenges facing them. It will be of interest to students and scholars researching cross-strait relations and also to conflict resolution think-tanks, policy makers and policy analysts.

*Region-Building in Southern Africa* - Chris  
Saunders 2013-07-04

How successful have Southern African states been in dealing with the major issues that have faced the region in recent years? What could be done to produce more cohesive and effective region-building in Southern Africa? In this original and wide-ranging volume, which draws on an interdisciplinary team of mainly African and African-based specialists, the key political, socio-economic, and security challenges facing Southern Africa today are addressed. These include the various issues confronting the Southern African Development Community (SADC) and its institutions; such as HIV/AIDS, migration and xenophobia, land-grabbing and climate change; and the role of the main external actors involved with the region, including the United Nations, the European

Union, the United States, and China. The book also looks at the Southern African Customs Union and Southern African Development Finance Institutions, including the Development Bank of Southern Africa and Industrial Development Corporation, and issues of gender and peacebuilding. In doing so, the book goes to the heart of analyzing the effectiveness of SADC and other regional organisation, suggesting how region-building in Southern Africa may be compared with similar attempts elsewhere in Africa and other parts of the world.

**Work Safety Regulation in China** - Jie Gao 2022-03-29

Fatality quotas implemented in China's industrial sector are being used to promote work safety and therefore, reducing the number of work-related deaths. Given the controversial nature of this policy, Gao analyzes how the fatality quotas are functioning to aid the country in balancing economic growth and social stability. The book also examines significant implications caused of this policy's implementation in the local regions, and reveals

how local officials attempt to handle these problems. This is the first book to systematically examine the role of death indicators in work safety improvement in contemporary China, revealing insight into Beijing's quota-oriented approach to policy-making.

*Examining Practice, Interrogating Theory: Comparative Legal Studies in Asia* - Helen J. Nicholson 2008-08-22

Legal transplantation and reform in the name of globalisation is central to the transformation of Asian legal systems. The contributions to *Examining Practice, Interrogating Theory: Comparative Legal Studies in Asia* analyse particular legal changes in China, Indonesia, Malaysia, Singapore, Thailand, Taiwan, and Vietnam. The contributions also concurrently critically analyse the utility of scholarly developments in comparative legal studies,

particularly discourse analysis; regulatory theory; legal pluralism; and socio-legal approaches, in the study of Asian legal systems. While these approaches are regularly invoked in the study of transforming European legal systems, the debate of their relevance and explanatory capacity beyond the European context is recent. By bringing together these diverse analytical tools and enabling a comparison of their insights through Asian empirical case studies, this book makes an invaluable contribution to the debates concerning legal change and the methods by which it is analysed globally, and within Asia.

**China's Anti-Monopoly Law -** Adrian Emch  
2013-07-01

It probably goes without saying that anti-monopoly law and practice are of very recent vintage in China. In August 2008, 118 years after the Sherman Act and 50 years after the Treaty of Rome, China's Anti-Monopoly Law (AML) came into effect. Since then the enforcement of the AML has seen significant progress as well as considerable challenges. This volume, comprised of 27 highly informative contributions by more than 40 government officials, academics, economists, in-house lawyers, and private practitioners, introduces novice practitioners to the complexities of antitrust law in China and provides new insight for those already working in the field. Generally following the structure of the text of the AML, topics and issues covered include the following: an overview of the first five years of AML

implementation; the institutional framework for antitrust enforcement in China; monopoly agreements between market players; abuses of dominance committed by a single company; problems and potential solutions for information exchanges between competitors; the economics underlying retail price maintenance; refusals to deal; procedural and substantive practice of merger decisions; the application of merger control to joint ventures; 'administrative monopolies' and the tension between competition and industrial policies; ways to seek legal redress; litigation (both administrative and civil) and the role of the courts; international cooperation efforts made in relation to Chinese antitrust enforcers; the relationship between the AML and China's anti-bribery rules; the treatment of vertical integration or cooperation; and how the AML rules apply to intellectual property rights. Throughout the book there are analyses of major judgments with key conclusions to be drawn from them, as well as

comparisons with corresponding judgments in other jurisdictions. This book is the first comprehensive analysis of the AML, and as such will be of inestimable value to business persons and in-house counsel, as well as to academics in Chinese law and competition law from a global perspective.

[Corporate Bankruptcy Law in China](#) - Natalie Mrockova 2021-01-28

This fascinating study uses qualitative and quantitative data and insights from interviews with judges, lawyers, government officials, entrepreneurs, bankers, consultants, and academics in China and abroad, to provide a new perspective on the problems that have hindered the implementation of the Enterprise Bankruptcy Law in China, and recent attempts at reform. The analysis provides unique insights into China's business world and its interaction with the judicial and political system in China. In addition, the book also provides important information about how the Enterprise

Bankruptcy Law affects foreign companies, agencies and governments that are active in China. The author draws on empirical data, decided cases and her experience of how the law and surrounding practices deal with foreign stakeholders whose interests are affected by corporate bankruptcy in China. The book will improve understanding of how China's corporate bankruptcy law has been used in practice, what has limited its practical effectiveness, whether it is desirable for the law to be used more readily in China, and the possible options for its reform.

*Gambling Dynamism* - Victor Zheng 2013-11-29  
Four years after the actual implementation of its casino deregulation policy, Macao has surpassed Las Vegas as the world's top gambling destination in terms of annual turnover. Also, various recent surveys have put Macao at the very top of the list in terms of per capita GDP, as its economy grew shortly after the resumption of

Chinese sovereignty. How could a tiny city without any natural resources on the southern coast of China have managed to achieve such a miraculous level of development? This book presents an unparalleled study of Macao's economic dynamism and its gambling industry not only by merging historical and current developments, but also by presenting solid subjective and objective indicators and evidence. It offers an indispensable resource for students, researchers, and general readers looking to understand Macao's gambling miracle.

**Banking Regulation in China** - W. He  
2014-03-06

Banking Regulation in China provides an in-depth analysis of the country's contemporary banking regulatory system, focusing on regulation in practice. By drawing on public and private interest theories relating to bank regulation, He argues that controlled development of the banking sector transformed China's banks into more market-oriented

institutions and increased public sector growth. This work proves that bank regulation is the primary means through which the Chinese government achieves its political and economic objectives rather than using it as a vehicle for maintaining efficient financial markets.

**Campsite** - Charlie Hailey 2008-06-01  
Camping is perhaps the quintessential American activity. We camp to escape, to retreat, to "find" ourselves. The camp serves as a home-away-from-home where we might rethink a deliberate life. We also camp to find a new collective space where family and society converge. Many of us attended summer camps, and the legacies of these childhood havens form part of American culture. In *Campsite*, Charlie Hailey provides a highly original and artfully composed interpretation of the cultural significance and inherently paradoxical nature of camps and camping in contemporary American society. Offering a new understanding of the complex relationship between place, time, and architecture in an increasingly mobile culture, Hailey explores campsites as places that

necessitate a unique combination of contrasting qualities, such as locality and foreignness, mobility and fixity, temporality and permanence, and public domesticity. Camping methods reflect the rigid flexibility of the process: leaving home, arriving at a site, clearing an area, making and then finally breaking camp. The phases of this sequence are both separate and indistinct. To understand this paradox, Hailey emphasizes the role of process. He constructs a philosophical framework to elucidate the "placefulness" -- or sense of place -- of such temporary constructions and provides alternative understandings of how we think of the home and of public versus private dwelling spaces. Historically, camps have been used as places for scouting out future towns, for clearing provisional spaces, and for making semipermanent homes-away-from-home. To understand how "cultures of camping" develop and accommodate this dynamic mix of permanence and flexibility, Hailey looks at three basic qualities of the camp: as a site for place-

making, as a populist precursor for modern built environments, and as a "method." Hailey's creative and philosophical approach to camps and camping allows him to construct links between such diverse projects as the "philosophers' camps" of the mid-nineteenth century, the idiosyncratic camping clubs that arose with the automobile culture in the early 1920s, and more recent uses of campsites as temporary housing for those displaced by Hurricane Katrina. In *Campsite*, Hailey makes a singular and significant contribution to current studies of place and vernacular architecture while also reconfiguring methods of research in cultural studies, architectural theory, and geography.

**Innovation in China** - Richard P. Appelbaum  
2018-10-15

China is in the midst of transitioning from a manufacturing-based economy to one driven by innovation and knowledge. This up-to-date analysis evaluates China's state-led approach to

science and technology, and its successes and failures. In recent decades, China has seen huge investments in high-tech science parks, a surge in home-grown top-ranked global companies, and a significant increase in scientific publications and patents. Helped by state policies and a flexible business culture, the country has been able to leapfrog its way to a more globally competitive position. However, the authors argue that this approach might not yield the same level of progress going forward if China does not address serious institutional, organizational, and cultural obstacles. While not impossible, this task may well prove to be more difficult for the Chinese Communist Party than the challenges that China has faced in the past.

**Cross-Cultural Management and Quality Performance** - Yomi Babatunde 2015-01-13

This book explores China's global competitiveness in the building of infrastructures with a particular interest in the resource-rich African countries. The book begins

with a comprehensive literature review on total quality management (TQM) and national culture, followed by reviews of the construction industries in China and Nigeria. This provides better understanding of the linkages between TQM, based on the International Organization for Standardization's ISO 9000 quality management systems (QMS), and national culture, based on Emeritus Professor Geert Hofstede's national cultural dimensions. Premised on the culture-specificity and bi-directionality relationships between TQM and national culture, this book investigates the construction industries in China and Nigeria including their strengths, weaknesses, opportunities, and threats (SWOT) as well as an appraisal of their historical and emerging relationships. In its conceptual approach, this book presents different models in the lead up to its primary theoretical contribution of a quality management assessment model (QMAM) that was adopted during the study's field work. The

book also presents relevant lessons relating to cross cultural management and quality performance not only to the Nigerians but also other foreign players in Nigeria's construction industry.

*Representing Yourself in Federal Court* - United States District Court 2017-08-04

This Handbook is designed to help people dealing with civil lawsuits in federal court without legal representation. Proceeding without a lawyer is called proceeding "pro se," a Latin phrase meaning "for oneself," or sometimes "in propria persona," meaning "in his or her own person." Representing yourself in a lawsuit can be complicated, time consuming, and costly. Failing to follow court procedures can mean losing your case. For these reasons, you are urged to work with a lawyer if possible. Chapter 2 gives suggestions on finding a lawyer. Do not rely entirely on this Handbook. This Handbook provides a summary of civil lawsuit procedures, but it may not cover all procedures that may

apply in your case. It also does not teach you about the laws that will control your case. Make sure you read the applicable federal and local court rules and do your own research at a law library or online to understand your case. The United States District Court for the Northern District of California has Clerk's Offices in the San Francisco, San Jose and Oakland courthouses. Clerk's Office staff can answer general questions, but they cannot give you any legal advice. For example, they cannot help you decide what to do in your lawsuit, tell you what the law means, or even advise you when documents are due. There are Legal Help Centers in the San Francisco, Oakland and San Jose courthouses where you can get free help with your lawsuit from an attorney who can help you prepare documents and give limited legal advice. This attorney will not be your lawyer and you will still be representing yourself. See Chapter 2 for more details.

**China's Legal System** - Pitman Potter

2014-01-30

China's struggle for the rule of law is at a critical juncture. As a key element of governance in the PRC today, China's legal system affects not only domestic affairs but also China's engagement with the world. But can a credible legal system emerge which protects the rights of citizens and international partners without undermining the power of the Party State? And is the Chinese Communist Party willing to embark on judicial reforms that may jeopardize its very survival? Understanding the PRC legal system is increasingly important as China rises to prominence in the world. In this compelling analysis, noted legal scholar Pitman Potter examines the ideals and practices of China's legal regime, in light of international standards and local conditions. Against a rich historical backdrop, Potter explains how China's legal system supports three key policy objectives; namely, political stability, economic prosperity, and social development. In exploring these

competing policy goals and the tensions between them, he also raises fundamental questions about government expectations of the role of law in regulating local and international socio-economic and political relationships. This wide-ranging and readable introduction will be an invaluable guide for students and non-specialists interested in China's ongoing process of legal modernization.

**The Law as it Could Be** - Owen Fiss 2003-10  
The Law As It Could Be gathers Fiss's most important work on procedure, adjudication and public reason, introduced by the author and including contextual introductions for each piece—some of which are among the most cited in Twentieth Century legal studies. Fiss surveys the legal terrain between the landmark cases of Brown v. Board of Education and Bush v. Gore to

reclaim the legal legacy of the Civil Rights Movement. He argues forcefully for a vision of judges as instruments of public reason and of the courts as a means of shaping society in the image of the Constitution. In building his argument, Fiss attends to topics as diverse as the use of the injunction to restructure social institutions; how law and economics have misunderstood the role of the judge; why the movement seeking alternatives to adjudication fails to serve the public interest; and why *Bush v. Gore* was not the constitutional crisis some would have us believe. In so doing, Fiss reveals a vision of adjudication that vindicates the public reason on which *Brown v. Board of Education* was founded.

**Maritime Security in the South China Sea** - Shicun Wu 2016-05-06

Maritime security is of vital importance to the South China Sea, a critical sea route for maritime transport of East Asian countries including China. The adjacent countries have

rendered overlapping territorial and/or maritime claims in the South China Sea which complicate the situation of maintaining maritime security and developing regional cooperation there. This book focuses on contemporary maritime security in the South China Sea as well as its connected sea area, the Straits of Malacca and Singapore. It identifies and examines selected security issues concerning the safety of navigation, crackdown on transnational crimes including sea piracy and maritime terrorism, and conflict prevention and resolution. In the context of non-traditional security, issues such as maritime environmental security and search and rescue at sea are included. The book explores ways and means of international cooperation in dealing with these maritime security issues.
