Early Akron's Industrial Valley
- Jack Gieck 2008

In this study of Akron's Cascade Locks, canal historian Jack Gieck examines the story of this remarkable lock system, including a look at early-nineteenth-century entrepreneurs who exploited the precipitous terrain to found one of the first industrial

centers in the American Midwest. A steep staircase of sixteen locks was required to raise canal boats 149 feet in a single mile in order to reach the Akron Summit. Early Akron's Industrial Valley is illustrated with photographs from the author's collection and the archives of the Canal Society of Ohio, the Ohio

Historical Society, the University of Akron, and the Cascade Locks Park Association. It contains a guide for Canalway hikers and bikers on the towpath through Akron's Cascade Locks Park with original maps by Chuck Ayers. This book will be welcomed by historians and engineers as well as by the many who find the surviving canals to be fascinating symbols of Ohio's heritage.

Crime & Criminology - Robert Douglas White 2008-09-25

This first Canadian edition of *Crime and Criminology: An Introduction* combines Canadian empirical research, policy, and legal issues to create a thoroughly Canadian text. Ideal for university and college students enrolled in introductory criminological theory courses, the book offers a solid foundation to criminology which unites traditional theories of crime with contemporary approaches and perspectives. By relating theory to everyday Canadian examples and events, students gain a solid grounding in the

major theoretical considerations of the nature and causes of criminal behaviour. New discussion on ecology and environmental theories are unique to this edition. Updated references reflect recent research in emerging fields of criminology.

Bridge Decks - Neal H.

Bettigole 1997

This book is a comprehensive

reference for the evaluation,

testing, selection, and

examination of relevant design

criteria and alternatives for

bridge decks, which appear in

the AASHTO/LRFD design

specifications. Important

challenges to civil engineers,

such as life cycle cost analysis,

and constructability,

particularly as related to

maintaining traffic during deck

replacement, are discussed.

The authors discuss why the

use of standard bridge deck

designs is not always possible on bridge rehabilitation projects. This practical reference will aid busy engineers in dealing with the major changes that will mandate much greater attention to deck selection and design in the future. For example, most future bridge projects will involve rehabilitation or replacement--which makes traffic maintenance a major issue--and life cycle cost analysis is quickly becoming mandatory in the U.S. This guide is intended to be used throughout the development of any construction project involving bridges. About the Authors Neal H. Bettigole, P.E., was director of the Exodermic Bridge Deck Institute, which he founded in 1985. Rita Robison was a freelance ditor/writer who worked as both an associate and a senior editor for Civil Engineering magazine.

Grid-Scale Energy Storage Systems and Applications - Fu-Bao Wu 2019-06-11
Grid-Scale Energy Storage Systems and Applications provides a timely introduction to state-of-the-art technologies and important demonstration projects in this rapidly developing field. Written with a view to real-world applications, the authors describe storage technologies and then cover operation and control, system integration and battery management, and other topics important in the design of these storage systems. The

rapidly-developing area of electrochemical energy storage technology and its implementation in the power grid is covered in particular detail. Examples of Chinese pilot projects in new energy grids and micro grids are also included. Drawing on significant Chinese results in this area, but also including data from abroad, this will be a valuable reference on the development of grid-scale energy storage for engineers and scientists in power and energy transmission and researchers in academia. Addresses not only the available energy storage technologies, but also topics significant for storage system designers, such as technology management, operation and control, system integration and economic assessment Draws on the wealth of Chinese research into energy storage and describes important Chinese energy storage demonstration projects Provides practical examples of the application of energy storage technologies that can be used by engineers

as references when designing new systems

Field and Service Robotics - Peter Corke 2006-08-03

The 5th International Conference on Field and Service Robotics (FSR05) was held in Port Douglas, Australia, on 29th - 31st July 2005, and brought together the worlds' leading experts in field and service automation. The goal of the conference was to report and encourage the latest research and practical results towards the use of field and service robotics in the community with particular focus on proven technology. The conference provided a forum for researchers, professionals and robot manufacturers to exchange up-to-date technical knowledge and experience. Field robots are robots which operate in outdoor, complex, and dynamic environments. Service robots are those that work closely with humans, with particular

applications involving indoor and structured environments. There are a wide range of topics presented in this issue on field and service robots including: Agricultural and Forestry Robotics, Mining and Exploration Robots, Robots for Construction, Security & Defence Robots, Cleaning Robots, Autonomous Underwater Vehicles and Autonomous Flying Robots. This meeting was the fifth in the series and brings FSR back to Australia where it was first held. FSR has been held every 2 years, starting with Canberra 1997, followed by Pittsburgh 1999, Helsinki 2001 and Lake Yamanaka 2003.

Each time I apply for a job, I get a reply that there is no vacancy but in this case I have caught you red-handed and you have no excuse because I even attended the

funeral to be sure that he was truly dead and buried before applying. Attached to my letter is a copy of my CV and his death certificate. *Crap CVs* is a hilarious compilation of the worst job applications imaginable, including overly-honest cover letters, embarrassing typos, mortifying personal revelations, awkward interview questions, misplaced self-confidence, self-aggrandizing gibberish, blatant truth-twisting and, of course, outright lies.

Pricing Electronic Commerce
In this book, we explore the
impact that the Web will have
on both the pricing decisions
that managers make, and the
pricing experiences that
customers will encounter. For
comfortable marketers, the
Web may have the most
unsettling pricing implications
they have yet encountered; for
the adventurous, it will offer
hitherto undreamed-of

opportunities. For many
customers, the Web will bring
the freedom of the price-
maker, rather than the
previously entrenched
servitude of the price-taker. We
introduce a scheme for
considering the forces that
determine a customer's value
to the firm, and the nature of
exchange. We use this scheme
to enable the identification of
forces that will affect pricing
on the Web, and then suggest
strategies that managers can
exploit. Chapter Outline: Web

Health Benefits of Secondary Phytocompounds from Plant and Marine Sources - Hafiz Ansar Rasul Suleria 2021-01-21

This new volume, Health Benefits of Secondary Phytocompounds from Plant and Marine Sources, looks at a selection of important issues and research topics on phytochemicals in plant-based therapeutics, covering bioactive compounds from both plant and marine sources. Natural products and their bioactive compounds are increasingly utilized in preventive and therapeutic medication, as pharmaceutical supplements, as well as in functional foods and nutraceuticals, all of which have potentially positive effects

on health and have preventive and curative properties for various diseases and health conditions. The first section of the book, on Bioactive Compounds from Plant Sources, describes the concept of extraction of bioactive molecules from plant sources, both conventional and modern extraction techniques, available sources, biochemistry, structural composition, and potential biological activities. Advanced extraction techniques, such as enzyme-assisted, microwave-assisted, ultrasound-assisted, pressurized liquid extraction, and super critical extraction techniques, are described in detail.

The Seven Deadly Sins - John Steinbacher 2008-05-05

The popularity of The Seven Deadly Sins dates back to the 4th Century. They enjoyed tremendous notoriety during the period we call the Middle Ages. While the popular assortment of sins is not directly from scripture, they have been the subject of many a sermon, lecture, writing and

art. In his book *The Seven Deadly Sins: And Why We Love Them*, Steinbacher examines each in detail. He gives examples of how they effect us and how we conduct ourselves in this world. Included in this book is Steinbacher's essay, *An Angel In My Garden*.

Principles of European Tort Law - European Group on Tort Law 2009-09-02

The European Group on Tort Law presents the results of its extensive research project, the *Principles of European Tort Law*. They were drafted on the basis of several comparative studies on the most fundamental questions of tortious liability and the law of damages. The Principles are not a mere restatement of the common core of tort law in Europe, but rather a proposal for a comprehensive system of tortious liability for the future, though necessarily linked to existing regimes. They are meant to stimulate discussion both among academics and practitioners and could serve as guidelines for national legislatures, thereby fostering

gradual harmonization. The text of the Principles, which is offered in English and several other languages, is accompanied by commentaries on the various parts elaborating their intended meaning and interplay.

A House to Remember - Edna Gammon 2011-10-10

What happened at 10 Rillington Place was so shocking and gruesome that even today everyone over a certain age still remembers the case with a shudder. In 1950, Timothy Evans was hanged for the violent murder of his baby daughter; he was also assumed to have murdered his wife. Then, less than three years later, another tenant, John Christie, was found to have killed at least six women, hiding their bodies in the garden, under floorboards and in a concealed kitchen alcove. Christie followed Evans to the gallows. It seemed unlikely that two murderers were living at 10 Rillington Place, and the evidence that emerged in the Christie case eventually led to Evans receiving a pardon. But

there was also circumstantial evidence that Evans had indeed killed his wife and child. Crime student Edna Gammon firmly believes that Evans was guilty. In *A House To Remember*, she explains why.

Understanding the Book of Job - Workbook - Tom Tompkins 2012-03-22

It is safe to say at the very

least, that the Bible is a fascinating book. A book full of many true tales, even struggles and disappointments, along with much information intended to help people grow and mature in their relationship with God. After all, it is impossible to have a positive relationship with someone we have not gotten to know and this principal applies to all relationships including one with God. While there is more than one way that our Heavenly Father reveals Himself to us, reading the Bible is one of the most important methods by which we can get to know Him. However, many shy away from reading the Old Testament for various reasons and one reason high on most people's list is due to the "gloom and doom." However, not reading the Old Testament portion of the Bible is similar to using half of the pieces to a 1000 piece puzzle. We will never see the big picture if we only use half of the included pieces. One of the most misunderstood and misused books of the Bible is the book

of Job. Yes, the book of Job is filled with suffering and difficult times in the life of Job and his family and friends. In turn, the book of Job has become a favorite among many when it comes to dealing with difficult times in their own life or the lives of others. This particular take, on the book of Job however, is written to help us understand the lessons that can be learned from Job's life. Through it, we can gain a better understanding of the character and nature of God Himself, by looking at the oldest book in the Bible, from a different angle. When we do so, we "change the lens" so-to-speak that we view this incredible story through, and I believe we will see things we otherwise never would have seen.

SA Mining - 2004

Recruiting Measures - Viola Grace

Kyna was shocked when she got an invitation to the Reset Project. She was even more shocked when she found out that her nephew had found her

application from decades earlier and forward it to the Volunteer Project. She had been mature then, she was older now, but her body was still her prison. Wracked with two types of arthritis, her body had been a temple to pain since childhood. The project says that it can reverse the effects on her body, so she cannot believe it actually works. Kyna gains her health with a few additions. Her hair is darker, longer, and her ears are pointed. The one fun alteration is her eyes, as she is tired of being overlooked. Kyna lands on Rai and begins her career helping the local retreat for wounded guardians to organize, and from there, she branches out and starts to perform her contracted obligation in guardian recruitment. A few years pass, and she comes home to a full house, her normal room occupied, and she is given one of the VIP rooms. Across the hall is a guardian who is a little gruff but very charming, and there is pain in his eyes. She was always very comfortable

with pain.

Life at the U. N. (below S. G. Annan's Floor) - Eric Waha 2004

In "Life at the U.N (below S.G. Annan's floor)", the author describes an ambitious couple working "at the U.N" for a contractor, The Catering Services: Lou Louis and his warrior-type wife Louise, who both try every honest mean to "get Louis in". [The U.N Secretariat payroll]. Over the 10 chapters relating the cloud of events and emotions that the Louis are going through; any reader and applicant for a better job, thinking of the U.N. as one of those great places to work, either for a career or for a "job", may quickly live a nightmare instead of the promised good pay and benefits, interesting work, friendly offices, and the chance to learn and grow... With an humorous-oriented style and purpose, Eric Waha adjusts in many ways the image of the "perfect U.N world", which as for everything worth having in life, will take much time and effort to any Secretary-General

or Member State to put back on right tracks in a reasonable amount of time, if one considers it, an achievable task...unless like many U.N executives, but not all fortunately, you prefer to put your sunglasses on !

*** Eric Waha is also the author of "U.N. Affairs" (2005) and "Invest Africa 2007". (January 2007) The book is now available at the following (online) librairies: Trafford Publishing, Amazon, Barnes & Noble, Books-A-Million, WorldCat, Borders, IndieBound, Alibris, PapaMedia, Dualj,Abebooks (Presidents and Heads of State), Revish, Boomerang Books Australia, Boekrecensie, Foyles Book Shop London, Inkmesh, EBay, Deastore, Yasni, U.N. Dag Hammarskjold Library within the U.N. Secretariat Headquarters in New York, etc...

***** The serious points presented in this satire are: What does the U.N. look like before February 2004? What

does the U.N. look like today? Bottomline= The U.N: A Productive, Secure and Comfortable Workplace? How many comfortable salaries and what about the money paid for deals, projects and consultancies that do not pan-out and U.N. staffers' egos, which lead to bad decisions? The U.N. are a political institution that promote peace and human security and economic and social progress in the world. a) They do Peace-keeping, b) They help in emergencies, c) They fight poverty, d) They protect the environment, e) They stand for human rights? f) They improve health and education, g) They build democracies, h) They set standards, i) They promote Women's rights, j) They prevent nuclear proliferation, k) They combat Terrorism. Are those concepts well promoted within the U.N. itself between country representatives /wihin the U.N. Secretariat ranks? Does the staff (not the country diplomats that make decisions) behave in a way that can make you conclude that they have

these goals at heart, that they act in their professional and private life with such respect for each of these goals and activities or is their reason for working for the U.N. essentially monetary?

According to the official discourse, "the Headquarters in New York city consist of four main buildings: the General Assembly building, the Conference Building, the 39-floor Secretariat building, and the Dag Hammarskjold Library, which was added in 1961. The complex was designed by an international team of 11 architects, led by Wallace K. Harrison from the United States. The Headquarters of the World Organization is located on an 18-acre site on the East side of Manhattan. It is an international zone belonging to all Member States. The United Nations has its own security force, fire department and postal administration with United Nations stamps. The building stands alongside courtyards, a staff cafeteria, a delegate's lounge and at the Public

Inquiries Unit, located in the public concourse, visitors can obtain additional information materials relating to the United Nations and its agencies. The United Nations postal counter - where visitors can buy UN stamps - a UN book store, gift shops, and a coffee shop are also located in the

Geological Monitoring - Rob Young 2009

"Geologic Monitoring is a practical, nontechnical guide for land managers, educators, and the public that synthesizes representative methods for monitoring short-term and long-term change in geologic features and landscapes. A prestigious group of subject-matter experts has carefully selected methods for monitoring sand dunes, caves and karst, rivers, geothermal features, glaciers, nearshore marine features, beaches and marshes, paleontological resources, permafrost, seismic activity, slope movements, and volcanic features and processes. Each chapter has an overview of the resource; summarizes features that could

be monitored; describes methods for monitoring each feature ranging from low-cost, low-technology methods (that could be used for school groups) to higher cost, detailed monitoring methods requiring a high level of expertise; and presents one or more targeted case studies."--Publisher's description.
