Spec Ops - William H. McRaven 2009-02-04

Vice Adm. William H. McRaven helped to devise the strategy for how to bring down Osama bin Laden, and commanded the courageous U.S. military unit that carried it out on May 1, 2011, ending one of the greatest manhunts in history. In Spec Ops, a well-organized and deeply researched study, McRaven analyzes eight classic special operations. Six are from WWII: the German commando raid on the Belgian fort Eben Emael (1940); the Italian torpedo attack on the Alexandria harbor (1941); the British commando raid on Nazaire, France (1942); the German glider rescue of Benito Mussolini (1943); the British midget-submarine attack on the Tirpitz (1943); and the U.S. Ranger rescue mission at the Cabanatuan POW camp in the Philippines (1945). The two post-WWII examples are the U.S. Army raid on the Son Tay POW camp in North Vietnam (1970) and the Israeli rescue of the skyjacked hostages in Entebbe, Uganda (1976). McRaven—who commands a U.S. Navy SEAL team—pinpoints six essential principles of “spec ops” success: simplicity, security, repetition, surprise, speed and purpose. For each of the case studies, he provides political and military context, a meticulous reconstruction of the mission itself and an analysis of the operation in relation to his six principles. McRaven deems the Son Tay raid “the best modern example of a successful spec op [which] should be considered textbook material for future missions.” His own book is an instructive textbook that will be closely studied by students of the military arts. Maps, photos.

Spain in the Age of Exploration, 1492-1819 - Chiyo Ishikawa 2004-01-01

This publication accompanies an exhibition of approximately 120 works of art and science loaned mostly from the Royal Collection of Spain (Patrimonio Nacional) to the Seattle Art Museum. Featuring the work of such artists as Bosch, Titian, El Greco, Bernini, Velázquez, Murillo, Zubarán, and Goya, this publication includes paintings, sculpture, tapestries, scientific instruments, maps, armor, books, and documents. Eight essays provide historical context and artistic explication. Chronologically organized, the book charts the evolution of Spanish attitudes toward knowledge, exploration, and faith during three dynasties of Spain's golden age, when the fervor for scientific and geographical knowledge coexisted with the expansion of empire and promotion of Christianity. The four themes of the exhibition are: The Image of Empire; Spirituality and Worldliness; Encounters across Cultures; Science and the Court. Spain in the Age of Exploration, 1492-1819, presents art and science from one of the most ambitious, magnificent, and complex enterprises in history.

To Believe in God? To Hope . . . Maybe - Giorgio Agretti 2021-08-05

A meditation over the existence of God, conceived in a sacred doubtfulness but which does not overshadow, though, religious hope. A bird's eye flight over man's need for spirituality, from ancient times to today's society, with a non-academical approach which makes it suitable for the everyday reader. An insight on how and why Christian religion came to us the way we know it and on the dichotomy between faith and reason through the centuries. Finally, a reflection about hope as the answer to the doubts and uncertainties that most Christians experience at some point in their lives.
